

CITY OF WHEATON  
FORESTRY DIVISION - 260-2122  
SHARED COST PARKWAY TREE PLANTING PROGRAM

TREES AVAILABLE FOR 2010 PROGRAM

IVORY SILK JAPANESE TREE LILAC: Approximate height 20 to 25 feet. Compact sturdy tree has dark green foliage with creamy white flowers in June. The bark is a reddish brown that becomes scaly with age.

RED SPLENDOR CRAB APPLE: Approximate mature height of 20 feet. Spring flowers are shades of pink, rose and lavender with red-green foliage in summer turning to red-purple in fall. Fruit is small and red persistent into winter. **To be planted only under utility wires.**

ACCOLADE ELM: Approximate height 60 to 70 feet. Fast growing tree has glossy dark green foliage during the summer, turning a golden yellow in the fall. Disease resistant.

NORTHERN RED OAK: **NATIVE.** Approximate mature height of 60 to 75 feet. Large sharply lobed, dark green leaves turn a beautiful red in autumn. These trees will be planted in the spring of 2011.

SWAMP WHITE OAK: **NATIVE.** Approximate mature height of 45 to 50 feet. Leaves are a lustrous dark green that hold late in fall turning yellow brown or fall green. These trees will be planted in the spring of 2011.

KENTUCKY COFFEETREE: Approximate mature height of 60 to 65 feet. Oval shaped tree with a moderate growth rate. Foliage is bluish-green in summer to a short lived yellow in fall. Picturesque bare limbed appearance in winter. Virtually no disease or insect problems.

SUGAR MAPLE: **NATIVE.** Approximate mature height of 65 feet. The foliage is dark green with the edges of the leaves sparsely and coarsely toothed. The leaves turn brilliant shades of yellow and orange in the fall. Medium growth. These trees will be planted in the spring of 2011.

AUTUMN BLAZE MAPLE: Approximate mature height of 50 feet. Rapid growing tree with a dense oval crown. Foliage is a rich green in summer with an excellent orange-red long lasting color in fall. A cross between red and silver maples with best features of each. Trees will be planted the spring of 2011.

COMMON HACKBERRY: **NATIVE.** Approximate mature height of 45 to 55 feet. Small bright green leaves turning yellow-green in fall. Narrow corky ridges on bark make this an attractive mature tree. These trees will be planted in the spring of 2011.

PLEASE RETURN THE ORDER FORM AND YOUR CHECK TO:  
CITY OF WHEATON  
P.O. BOX 727  
WHEATON, IL. 60187-0727

PARKWAY TREE PLANTING REQUIREMENT

1. NEW SUBDIVISIONS: The City will not plant parkway trees in any subdivisions where the improvements have not been approved and accepted by the City of Wheaton.  
  
Prior to subdivision acceptance, the developer is responsible for planting healthy parkway trees and guaranteeing them for one full year.  
Subdivision Requirements: one (1) tree per lot/ two (2) trees on corner lots.
2. Trees shall be spaced 30-35 feet apart.
3. Trees in the parkway shall not be planted within 10 feet of alleyways, utility poles, street light poles, or within 5 feet of driveways, fire hydrants, or utility service lines.
4. On corner lots, trees must not be planted within 30 feet of the intersection of the corner property lines adjoining the street right-of-way.
5. Trees will not be permitted on residential parkways where there is less than 8 feet between the sidewalk and curb or edge of pavement.
6. Trees will not be permitted on residential parkways where there is less than 14 feet between the property line and curb or edge of pavement.
7. Trees which will exceed 20 feet in height at maturity shall not be planted under overhead utility lines.
8. Normal location of trees shall be 10 feet from the property line.
9. If the Forestry Division determines that there is not enough room to plant a tree or if soil conditions at the selected site for planting are not conducive to tree growth, the purchaser of the tree will have his money refunded.

NEW TREE CARE

1. All trees should be securely staked or guyed until the roots become established. Guys shall have indicator tapes placed on them to prevent accidents.
2. Your newly planted tree requires care, especially during the first two years. Trees planted in heavy clay soils should be watered thoroughly about twice a month during dry weather, and those in light or sandy soils, more often for the first two years.

GUARANTEE

Parkway trees planted by the City are guaranteed for one growing season. The City will provide one replacement tree, at no cost to the homeowner, for each tree that does not survive the first year.

ALL ORDERS MUST BE RECEIVED BY JULY 1, 2010
